- Saginaw, Michigan 48604, August 2006 – SWS-Trimac, Inc. Adds 2nd Haas VF2 Machining Center.

Production machining work continues to grow in the Saginaw Production Facility. In order to accommodate this increase a new Haas VF2 Mill was purchased.

- Saginaw, Michigan 48604, October 2006 – SWS-Trimac, Inc. Adds Rofin-Sinar 850 CO2 Laser Welder.

SWS-Trimac, Inc. has added a new Rofin-Sinar 850HF Laser Welder to the Saginaw Operations Facility. The increasing workload from Production jobs and the increasing volume of prototyping and development jobs has prompted SWS-Trimac, Inc. to add this capital equipment to maintain our current delivery schedule.

- Saginaw, Michigan 48604, October 2006 – SWS-Trimac, Inc. Adds General Manager Position to Roster and re-organizes key personnel. Also SWS-Trimac, Inc. has hired 6 new employees and maintains an average of 7 temporary employees every month.

So far in 2006 SWS-Trimac, Inc. has had a continued increase in sales. Due to the increase in sales it was necessary to add a General Manager position to the roster. Also key personnel have been re-organized to better match their skills to each required position. This included hiring 6 new employees. It has also been necessary to maintain an average of 7 temp-positions in the 2nd.

- Saginaw, Michigan 48604, November 2006 – SWS-Trimac, Inc. Adds STAR Pulse Nd:YAG Laser Welder.

SWS-Trimac, Inc. has added a StarWeld (Nd:YAG Laser) Performance Manual Welder to the equipment arsenal. This welding machine will allow SWS-Trimac, Inc. to enter the manual laser welding market; it will also reduce the need for complex weld tooling in some Electron Beam Welding applications.
