Hammond Polishing Lathe added to the Finishing Department

Saginaw, Michigan 48604, April 30, 2004 – SWS-Trimac, Inc. has added a Hammond Polishing Lathe to the finishing Department to expand out capabilities in this area this past month.

We have a few customers in the bio-medical industry and the look of their product is everything. Up until this month we have used other means to get the finish that our customers required. With this machine we are able to polish and finish these products much quicker and with better results.
