Creation of the EDM Department:

Mitsubishi Wire SX-10 added to the SWS-Trimac, Inc. Equipment Arsenal

Saginaw, Michigan 48604, January 30, 2004 – SWS-Trimac, Inc. purchased a Wire EDM this past month to increase the capability of the every-growing machining department.

The 2004 goal of SWS-Trimac, Inc. is to expand its capabilities in all areas of production; this month a Wire EDM was added to do just that. Instead of just machining and welding on a project and having to out-source EDM work, this piece of equipment will allow SWS-Trimac, Inc. do to more for our customers in-house and preserve quality control.

The future plans of SWS-Trimac, Inc. include the addition of new Milling Centers over the next four months.
